Community c at level ℓ: GraphRAG items P, in-scope set E_{in}, boundary set E_{bd}
Does P fit in B?
yes
Keep all of P; no pending facts
no
Keep the longest prefix of P within fB
Reserve compact facts for what GraphRAG's own prefix represented
Reserved facts fit in B?
no
Fallback: use GraphRAG's own prefix, no reserved facts
yes
Add bridge records for E_{bd} (support $\geq m$), up to bB
Add compact facts for pending in-scope relationships, up to B
Render; drop trailing facts until the exact token count is $\leq B$
Input X; residual = the rest
